Handicare **4000** stairlift

FOR CURVED STAIRCASES

A Twin-Rail Design for a Tight Fit Around Bends and Curves

The Handicare 4000 stairlift makes it easy to eliminate the barrier of stairs. The twin-rail design fits tightly to the wall and around bends to maximize the available space on the stairs. Your custom stairlift is designed with our industry leading photo measuring system – including the option to see how it will look on your stairs before you buy it. If your stairs feature a change in direction, pie-shaped stairs, or you would like to add out-of-the-way parking for your stairlift, the Handicare 4000 can be an ideal solution for you.

The custom-made travel rail is fabricated in North America to the precise measurements of your stairs creating a close fit to your staircase with optional out-of-the-way parking.

Handicare **4000** | Twin-Rail Curved Stairlift

Comfort, style and fit matter. That's why we have a selection of seat options to complement your home design and your mobility needs. See back page for chair measurements for each seat, including armrest width.

Simplicity
A classic look with an easy-to-clean leatherette finish (in sand) and manual fold-up seat, armrests, footrest and swivel.

Style
A polished design (in vanilla) that's built for comfort. Perfect to pair with power swivel and power footrest options.

Smart
An endless array of options and upgrades to satisfy all needs and personal tastes.

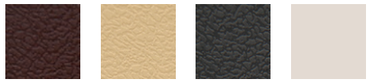

Perch
Ideal for those with knee or hip problems, the raised seat and reduced seat depth allow you to ride slightly standing.

Outdoor
Specialized UV-protected upholstery (in slate) provides longevity outdoors without fading or cracking.

Color Options

Seat Colors

Cacao Sand Slate Vanilla

Standard Rail Colors

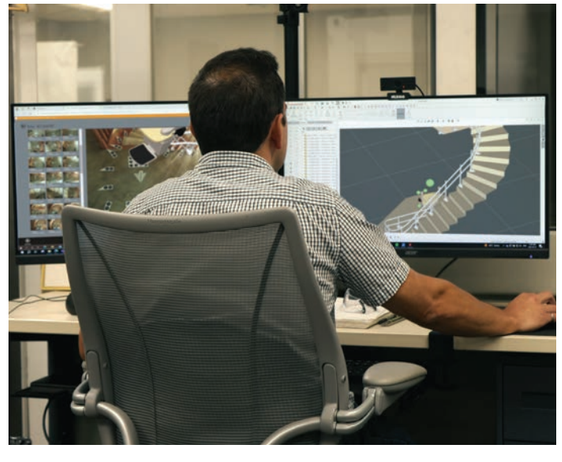

Black Brown Light Grey

Custom rail colors available at additional charge

Home Assessment

Your local authorized dealer will conduct a home assessment that includes precision photo measuring with our unique PS4D system to ensure a perfect fit. Our leading edge system shows you in 3D how the stairlift will look on your staircase – before you place your order!

Fabrication and Installation

Our engineers create a computer-aided drawing for custom fabrication in our North American factory. The standard capacity stairlift features fewer floor stanchions than other curved stairlifts for a sleeker appearance. Installation by your local dealer takes a few hours to a full day.

Power Up Convenience

Power Folding Footrest
Choose the powered footrest to eliminate bending down to fold and unfold the footrest.

Power Swivel
With a simple toggle of a switch, the seat turns so you're safely facing the top landing and not the staircase when getting up from the lift.

Power Folding Hinge
If you have an open area or doorway at the base of the stairs, the power hinge keeps the area free and clear of tripping hazards.
◂ *Shown left*

More Features

Twin Rail
The design of the double rail system creates a close fit to the wall or side railing, leaving maximum space on the stairs. Turns and parking features are also tightly curved for a less intrusive appearance.

Safety Counts
The Handicare 4000 includes a retractable seatbelt, overspeed brake and obstruction sensor system on the footrest and carriage.

Battery Powered
With charging stations at the top and bottom landing, your stairlift is always powered and will make several trips up and down during a power outage.

Operation Ease
The armrest toggles are easy to use, along with two remote controls so you can call the lift from the top or bottom of the stairs.

Parking Options
Add a parking station to keep your stairlift out of the way when not in use.
