Savaria® Luma

Through-floor lift

Beautiful access lives with the Savaria Luma through-floor lift

Like a home elevator, but without the need for a shaftway, the Luma lift provides easy two-level service for your home. Finely finished with a luxury feel and panoramic views, the Luma Lift is proudly designed and built by Savaria, a world leader in accessibility products.

Make Your Steps Effortless

The Luma lift fits easily into your home with its self-supporting rails and concealed quiet drive system. The fully enclosed cabin with crystal clear acrylic panels, elegant lighting system and neutral white finish makes Luma feel spacious and at home in virtually any décor.

Modern simple design
Designed for simplicity, the Luma lift is easy to use with large, backlit buttons. Get peace of mind with included Savaria Link wi-fi monitoring by your local dealer, as well as our One Touch Alert system and in-cabin status panel.

Fast and flexible installation
Installation can be completed in just a one or two days. Construction preparation generally requires a simple floor cut-out and floor bracing. A self-supporting rail system and compact footprint gives the Luma Lift floorplan flexibility. Tuck into a corner, or place it anywhere in the room.

Safety
Savaria takes pride that the Luma Lift meets all safety code standards. This includes a fully enclosed cabin equipped with door interlock to eliminate any safety hazards.
A safety pan sensor system stops the lift should it meet any obstruction in either direction.

Easy Access
A stylish non-skid floor with sloped threshold allows for easy access without the need for a pit or ramp. Luma features a full-sized door while a second door can be added to provide straight-through access to accommodate your home's floorplan.

Efficiently powered
Luma is battery-powered and can operate both up and down for as many as five trips during a power outage. The winding drum drive is quiet and inexpensive to run on standard household power.

Sloped threshold and attractive non-skid flooring

Handrail and full height acrylic panels

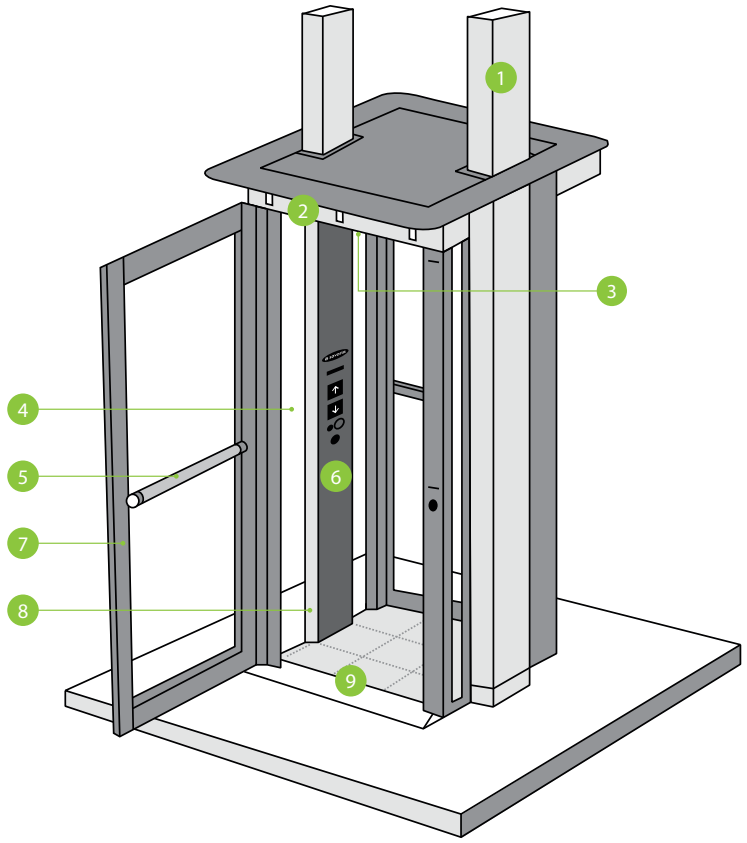

Self-supporting rails with tucked-away cable system

Simple, intuitive operation with in-cabin lift status LCD panel

Savaria® **Luma** | Through-floor lift
