

On-demand accessibility without significant renovations

Custom built to fit stairs with curves or multiple levels

ADA-compliant platform available

< Outdoor application with stainless steel rails (shown left)

Savaria® Pegasus

INCLINED PLATFORM LIFT

ACCESS OVER STAIRS WITH CURVES OR MULTIPLE LEVELS

When you need wheelchair access over stairs with multiple levels, curves or intermediate landings, the Savaria Pegasus inclined platform lift (IPL) is a flexible, cost-effective choice with its space-saving foldaway design and optional out-of-the-way parking. Whether for a place of business, worship or any public space, each unit is custom-built to the specific measurements of the project to provide a smooth and comfortable ride. Optional configurations include vertical bend, steep start, 90° turn, 180° turn and special bends.

Safety features include an obstruction sensor system on the platform, non-skid platform with side safety flaps, overspeed governor, manual lowering device, keyed access for call stations and emergency stop button.

Savaria® Pegasus

INCLINED PLATFORM LIFT

ACCESS OVER STAIRS WITH CURVES OR MULTIPLE LEVELS

- Custom designed for access over stairs with multiple levels, curves or landings
- Space-saving design with foldaway platform for full access to stairs when lift is not in use
- Ideal solution when an elevator or vertical platform lift cannot be accommodated
- Minimal construction needed with no machine room required
- Optional custom colors for rails or carriage, or stainless steel rails
- User-friendly continuous-pressure operation with motorized folding platform, automatic ramps and powered folding safety arms, optional side ramp access
